长对话：视听一致

课程简介

在本次课程中，我们将结合真题实例，学习视听一致技巧在长对话听力题型中的应用，帮助同学们高效作答，轻松拿分。

课堂例题

技巧范例 A) She is a website designer. B) She is a university graduate. C) She is a main street store owner. D) She is a successful entrepreneur. 真题实战 题一： A) Serve as a personal assistant. B) Play a key role in Real Madrid. C) Run common daily chores for the woman. D) Help promote Mr. Sanchez's public profile. 题二： A) It is a must for rational judgment. B) It is more of a sin than a virtue. C) It is a good quality in the workplace. D) It is more important now than ever.	笔记区：
--	-------------

听力原文

技巧范例 M: In this episode of Money Talks, our guest is Molly Sanders, a university student and a successful young entrepreneur. Molly, tell us about your business. W: Well, I sell specialty clothes through a website, mainly for women who have trouble finding suitable clothes in main street shops because of their height or weight. But I do some men's clothes too. M: How did you get started in this business at such a young age? Are you studying fashion design? W: Actually, I'm majoring in finance, but I've always loved clothes, and I started making my own at 14. 真题实战 题一: W: As we all know, being such a famous football player at Real Madrid, Mr. Sanchez has a very high public profile. This means he cannot leave the house without being recognized and harassed. M: Yes, I completely understand how imperative it would be to respect Mr. Sanchez's private life. W: Good. As his personal assistant, you would be required to run common everyday chores for Mr. Sanchez, things he cannot do himself due to his fame, like going to the supermarket or post office.	笔记区:
--	-------------

题二:

M: Some employ their persuasive vocabulary and influential communication style to win workplace arguments by compelling people to perform the intended action.

W: Exactly. Too honest? Isn't that a good thing? I thought that's surely something we should have covered earlier in the section discussing strengths and talents, but no. Honesty was deemed to be more of a sin than a virtue, since it made people feel uncomfortable, or at least it made the most powerful folks feel uncomfortable.

M: Indeed. Rhetoric is viewed by many philosophers as the method through which the powerful accumulate more power.

长对话：同义替换

课程简介

在本次课程中，我们将结合真题实例，了解同义替换的几种分类，并学习同义替换技巧在长对话听力题型中的应用，进一步提高解题效率。

课堂例题

技巧范例 A) Having someone who has confidence in them. B) Having someone who is ready to help them. C) Having a firm belief in their own ability. D) Having a realistic attitude towards life. 真题实战 题一： A) He offers them ample editorial guidance. B) He recommends model essays to them. C) He gives them encouragement. D) He teaches them proofreading. 题二： A) Study fashion design at college. B) Improve her marketing strategy. C) Add designs for women. D) Expand her business.	笔记区：
---	-------------

听力原文

技巧范例 M: With me in the studio today is Ms. Jane Logan, author of a new book, <i>Secrets to Success</i>. She claims to have uncovered how people achieve success. So Ms. Logan, in your book you claim that successful people have many things in common. For instance, they know their strengths when pursuing a goal. W: That's right. They also tend to be motivated by a negative or positive life event. They credit their success to having someone in their life who believes in them. M: You also write that there are a number of different factors related to success. And while successful people are driven to achieve their goals, the ultra-successful have even greater ambition. W: Yes, greater ambition as well as a burning desire to be the best of the best is also a common characteristic. 真题实战 题一: M: They are independent, and they have their own curiosities and obsessions. You can talk to them about fairly sophisticated subject matters such as politics. W: Yes, that does sound refreshing compared with talking to younger children. Do they ask you to proofread their essays? M: Certainly, with writing they do. I really just try to be encouraging. I think at this age editorial guidance is less	笔记区:
---	-------------

important than encouragement.

W: Are there books that you think are important that your children read and that all children read?

M: My general thought is to read widely and to incorporate a love for reading. Learning to love to read, I think, is the optimal thing because it gives you a skill you can take anywhere.

题二:

M: How did that happen? Did you see a gap in the market and decide to fill it?

W: No, when I started university, some classmates complimented my clothes, and when I said I made them myself, other tall women started asking if I would make theirs, and I did. And before I knew it, I was an entrepreneur.

M: So what are your plans for the future? Do you intend to open a physical store?

W: No, I'll keep things online to keep costs down, but I will add more clothes for children, both girls and boys, and possibly even for infants. And I hope to add to my range of designs for men.

课堂例题

首末原则 A) She is an acclaimed hostess of Book Talk. B) She is a critic of works on military affairs. C) She is a historian of military history. D) She is a researcher of literary genres. 互动原则 A) She conducted surveys of many soldiers. B) She visited soldiers' wives and mothers. C) She looked into the personal lives of soldiers. D) She met a large number of soldiers in person. 信号词 A) Its style has remained largely unchanged. B) It is still going through experimentation. C) It is frequently accompanied by singing. D) Its definition is varied and complicated.	笔记区：
--	-------------

听力原文

首末原则 M: Welcome to this week's episode of Book Talk. With me today is Heidi Brown, a historian who has written five critically acclaimed books about military history. W: Thanks for having me, John. I'm so excited to talk about my latest book, which was published last month. M: So this book is a novel, your first attempt at that genre. I thought it was a bit of a departure for you. 互动原则 M: Right. So how did that happen? You spent three decades writing about the past and focusing on the 18th and 19th centuries. And now you're speculating about the future. W: Well, after years of researching soldiers and chronicling their lives during battle, I just started wondering about other facets of their lives, especially their personal lives. M: I can see that. Your novel is about soldiers, but it focuses on their relationships, especially the bond between sons and mothers, and men and their wives. W: Yes. That focus came about when I still intended to write another book of history. I started by researching soldiers' actual personal lives, studying their letters home. M: So how did that history book become a novel? 信号词 M: So how would you define Jazz? W: Well, interestingly enough, there's no agreed-upon	笔记区:
--	-------------

definition of Jazz. Indeed, there are many different styles of Jazz. Some have singing, but most don't. Some are electric and some aren't. Some contain live experimentation, but not always. While there's no simple definition for it, and while there are many different styles of Jazz, you simply know it when you hear it. Honestly, the only way to know what Jazz is, is listen to it yourself. As a great trumpet player, Louis Armstrong said, if you gotta ask, you'll never know.

课堂例题

技巧范例 A) To avoid them in the future. B) To warn others against them. C) To make good sense of them. D) To reflect on their causes. 真题实战 题一： A) It is generally recognised as a world heritage site. B) It is the fastest way to reach the city's south side. C) It constitutes a source of revenue for the city. D) It helps reduce traffic jams in the city center. 题二： A) They are usually crowded. B) They use high-tech systems. C) They accept smartcards only. D) They are colorfully decorated.	笔记区：
---	-------------

听力原文

技巧范例 But how does stress improve memory? It's simple. When your brain cells multiply, your memory can improve. Viewed from a biological perspective, this makes sense, because animals that are better at remembering dangerous situations can avoid them in the future. If an animal encounters a predator and escapes, for example, it's important to remember where and when that encounter happened. Experts assert that the same principle applies to humans. 真题实战 题一: The subway in its present form reopened for operation in April 1980. Since its relaunch, the subway has seen a revival in its fortunes. It serves as a viable alternative to other forms of transport, and has gone a long way to alleviate traffic jams in the city center. In 1996, the system reached an important milestone—100 years. To commemorate this special event, the color scheme of the train carriages was updated. 题二: In 1996, the system reached an important milestone—100 years. To commemorate this special event, the color scheme of the train carriages was updated. Recently, high-tech systems such as smart card ticketing machines and	笔记区:
---	-------------

smart gates are used across all subway stations. The smart card provides more convenient travel and passengers simply top up their cards and tap them to get in and out the subway. Since its launch, the technology has been adopted by more than 100,000 subway customers.

课堂例题

技巧范例 A) Consumers visualize their activities in different weather. B) Good weather triggers consumers' desire to go shopping. C) Weather conditions influence consumers' buying behavior. D) Consumers' mental states change with the prices of goods. 真题实战 题一： A) They bring more benefits to young people. B) They require less supervision and training. C) They are more suitable to young people. D) They have fewer rules and pressures. 题二： A) It is quite common. B) It is rarely noticed. C) It seldom annoys people. D) It occurs when one is alone.	笔记区：
--	-------------

听力原文

技巧范例 Weather is a constant force in our lives, but there's little marketing research on how it affects businesses. Now, a new study reveals how sunny and snowy conditions influence consumer behavior. Those weather conditions trigger consumers to mentally visualize using products associated with the respective weather. This leads to consumers placing a higher value on those products, that is, they're willing to pay more money for them. But the correlation is only found with products related to being outside. 真题实战 题一: Adventure sports are undeniably attractive to many energetic and thrill-seeking kids. Sports like rock climbing, surfing, skiing, and mountain biking, thus have lots of appeal. They don't have many of the rules and pressures of traditional team sports, but they still have all the benefits of outdoor physical activity. When properly supervised, extreme sports can be a part of a healthy, balanced life. Some adventure sports may be associated with higher risks of injury, so it's important for kids to figure out when to take risks, and when not to.	笔记区:
---	-------------

题二:

Do you ever have the annoying feeling that you don't have time to really think anymore? You're not alone. A variety of factors have conspired to rob us of time for reflection about ourselves and our lives. Today, our preoccupied minds are rarely silent. The average person receives hundreds of texts and voice messages a day, and holidays for many of us are action-packed weeks, more likely full of family activities than opportunities for tranquility and contemplation.

课堂例题

首末原则	笔记区：
A) Farmers helped Native Americans grow crops. B) There were expansive university campuses. C) There existed post offices. D) Migrants found gold there.	
复现技巧	
A) Engaging in intense activity. B) Fantasizing in one's down time. C) Working on a particular project. D) Reflecting during one's relaxation.	笔记区：
信号词	
A) Consumers often have a craving for the latest model. B) Such products tend to comprise parts that are irreplaceable. C) Tech firms intentionally design products to have short lifespans. D) Manufacturers use effective strategies to promote fancier products.	

听力原文

首末原则

Even before Colorado was a state, it had post offices. The first opened in 1859 in a settlement founded by migrants searching for gold. Life could be unpredictable at West—gold failed to appear, drought ruined farmers and settlers clashed with Native Americans. On the settlement's location, now stands a sprawling university campus. Amid all the changes, one feature remained constant—the postal service.

复现技巧

Almost all of the great advisors that I have studied have found ways to get away from it all and contemplate their life and work. Some researchers in the field of creativity, in fact, believe that insight occurs during the reflection and relaxation that follows a period of intense activity. Schedule time for reflection about your work, or a particular project you're engaged in. I usually block out half an hour. Don't answer the phone; push your papers to the side; sketch; make lists; draw mind maps of ideas that come to you. At the end, write down any emerging ideas. When you're alone, stop worrying and think. A lot of our down time is spent worrying about troublesome things in our lives or fantasizing about how we'd like our lives to be. Revisit things during moments of relaxation, after a period of intense work. This is when we are the most creative.

笔记区:

信号词

The shiny gadgets of today will be waste tomorrow. Manufacturers don't talk much about this when they announce the big new thing that will replace your mostly just as good old thing. In fact, technology firms often purposely design devices that will not last long and cannot be repaired so that consumers will have to spend their money on a new one. This year, the French government began requiring tech manufacturers to list a repairability score. If a device can be repaired, then its life can be extended, saving consumers money and the planet the burden of so many trashed gadgets.

课堂例题

技巧范例 A) Abilities of human babies. B) Adults' influence on children. C) Cognitive features of different newly born mammals. D) Similarities between human babies and baby animals. 真题实战 题一： A) It is now the biggest and busiest airport in Europe. B) It is the worst managed airport in German history. C) It has become a typical symbol of German efficiency. D) It has become something of a joke among Germans. 题二： A) It requires mathematicians to work independently. B) It is faced with many unprecedented challenges. C) It lags behind other disciplines in collaboration. D) It calls for more research funding to catch up.	笔记区：
---	-------------

听力原文

技巧范例 In last week's lecture, we discussed the characteristics of the newly born offspring of several mammals. You probably remember that human infants are less developed physically than other mammals of the same age. But in today's lecture, we'll look at three very interesting studies that hint at surprising abilities of human babies. 真题实战 题一: Today I'm going to talk about Germany's dream airport in Berlin. The airport looks exactly like every other major modern airport in Europe, except for one big problem: more than seven years after it was originally supposed to open, it still stands empty. Germany is known for its efficiency and refined engineering, but when it comes to its new ghost airport, this reputation could not be further from the truth. Plagued by long delays, perpetual mismanagement and ever-soaring costs, the airport has become something of a joke among Germans—and a source of frustration for local politicians, business leaders and residents alike. 题二: The collaborative trend is true across scientific disciplines. Some fields, though, have a greater tendency for it. Particle physicists and astronomers collaborate often. This is	笔记区:
--	-------------

because they must share expensive facilities. Mathematicians, by contrast, tend historically towards solitude. As a consequence, they lag behind other disciplines. However, Wagner says partnerships are rising there too. The level of collaboration also varies from country to country. "There are historical and political reasons as to why collaborations emerge," says Wagner.

讲座/访谈：同义替换

课程简介

课堂例题

技巧范例 A) It consumes almost a quarter of the body's total energy. B) It continues to burn up calories to help us stay in shape. C) It uses up much less energy than it does in deep thinking. D) It remains inactive without burning calories noticeably. 真题实战 题一： A) The more you are exposed to something, the more familiar it'll be to you. B) The more you are exposed to something, the deeper you'll understand it. C) The more you experience something, the longer you'll remember it. D) The more you experience something, the better you'll appreciate it.	笔记区：
--	-------------

题二:

- A) Teenagers' memories are more lasting.
- B) Teenagers' emotions are more intense.
- C) Teenagers are much more sensitive.
- D) Teenagers are much more sentimental.

听力原文

技巧范例 In 1984, the World Chess Championship was called off abruptly, due to the withered frame of a player who was competing for the title. He wasn't alone in experiencing the extreme physical effects of the game. Elite players can reportedly burn up to an absurd 6,000 calories in one day. Does that mean that thinking harder is a simple route to losing weight? Well, when the body is at rest, we know that the brain uses up a startling 20% to 25% of the body's overall energy. This level of utilization actually makes the brain the most energy-expensive organ in the body, and yet it makes up only 2% of the body's weight overall. 真题实战 题一: There could be a biological explanation for this, as there is evidence that the brain's ability to make subtle distinctions between different chords, rhythms and melodies deteriorates with age. So to older people, newer, less familiar songs might all "sound the same". But there may be some simpler reasons for older people's aversion to newer music. One of the most researched laws of social psychology is something called the "mere exposure effect", which in essence means that the more we're exposed to something, the more we tend to like it. This happens with people we know, the advertisements we see, and the songs we listen to.	笔记区:
--	-------------

题二:

When you're in your early teens, you probably spend a fair amount of time listening to music or watching music videos. Your favorite songs and artists become familiar, comforting parts of your routine. For many people over 30, job and family obligations increase, so there's less time to spend discovering new music. Instead, many will simply listen to old, familiar favorites from that period of their lives when they had more free time.

Of course, those teen years weren't necessarily carefree. They're famously confusing, which is why so many TV shows and movies revolve around the high school turmoil. Psychology research has shown that the emotions that we experience as teens seem more intense than those that come later. And we also know that intense emotions are associated with stronger memories and preferences. Both of these might explain why the songs we listen to during this period become so memorable and beloved.

课堂例题

首末原则 A) Job candidates can respond freely due to its open-ended nature. B) Job candidates rarely take it seriously. C) Job seekers often feel at a loss where to start in answering it. D) Job seekers tend to have a ready answer. 复现技巧 A) Not benefiting from free-market capitalism. B) Not playing a role in a workplace revolution. C) Not spending enough time on family life and leisure. D) Not earning enough money to provide for the family. 信号词 A) They no longer listen to new music. B) They find all music sounds the same. C) They can make subtle distinctions about music. D) They seldom listen to songs released in their teens.	笔记区：
---	-------------

听力原文

首末原则 "Tell me about yourself" may seem like an easy job interview question. But the open-ended nature of this question often leaves job seekers at a loss where to start. This common question is actually a critical test of a job candidate's communication skills. So it's important not to give an unprepared response or mess it up. "Tell me about yourself" is often the first question professional career coaches prepare people for when they give interview guidance. 复现技巧 Free market capitalism hasn't freed us—it has trapped us. It's imperative for us to embrace a workplace revolution. We are unlikely to spend our last moments regretting that we didn't spend enough of our lives slaving away at work. We may instead find ourselves feeling guilty about the time we didn't spend watching our children grow, or with our loved ones, or travelling, or on the cultural or leisure pursuits that bring us happiness. Unfortunately, the average full-time employee in the world works 42 hours a week, well over a third of the time we're awake. Some of our all too precious time is being stolen: office workers do around 2 billion hours of unpaid overtime each year. So it is extremely welcome that some government coalitions have started looking into potentially cutting the working week to four days.	笔记区:
---	-------------

信号词

Why do old people dislike new music? As I've grown older, I often hear people my age say things like "They just don't make good music like they used to". Why does this happen? Luckily, psychology can give us some insights into this puzzle. Musical tastes begin to crystallize as early as age 13 or 14. By the time we're in our early 20s, these tastes get locked into place pretty firmly.

In fact, studies have found that by the time we turn 33, most of us have stopped listening to new music. Meanwhile, popular songs released when you are in your early teens are likely to remain quite popular among your age group for the rest of your life.

There could be a biological explanation for this, as there is evidence that the brain's ability to make subtle distinctions between different chords, rhythms and melodies deteriorates with age. So to older people, newer, less familiar songs might all "sound the same".

长对话真题实训

听力原文

Conversation One M: How's your dissertation going? I'm proofreading my first draft and will submit it to my professor tomorrow. W: Oh, I haven't even started writing mine yet, so I'm really worried about finishing by the end of next semester. M: You mean you haven't even begun yours yet? The final draft is due in five months. W: Of course I've started it, but I can't get to the writing yet, as I haven't found enough resources to use, so I'm still researching the topic. M: Maybe the problem is the way you're doing your research. I started by talking to my professor about where to look for information. And based on that, I found books in the library and a lot of reputable journal articles on the Internet. W: I've tried all that, but don't have enough to write the dissertation as my department's minimum length is 70 pages. I think the problem is that my topic isn't viable. And honestly, my professor did warn me at the beginning that I might not be able to find enough material. But I was so interested in the topic that I didn't let his advice deter me. M: Well, I suggest you find a new topic. After all, our professors are here to guide us, so it's best to listen to them. W: In retrospect, I wish I had listened to him, but I didn't. And now I don't want to give up my topic as I've already invested so much time and energy. M: If you're committed to your current topic, maybe you	笔记区:
---	-------------

could make some adjustments rather than abandon it completely. What is your topic?

W: It's "Depictions of Femininity and Folklore from the South of the Country".

M: That's pretty narrow. You could find more material if you made the topic broader, maybe by including other kinds of depictions.

W: Broadening the topic is a great idea. I'll start by including folklore from other regions of the country.

4. A) Daydreamers did better than non-daydreamers in task performance. B) Non-daydreamers were more focused on their tasks than daydreamers. C) The difference in performance between the two groups was insignificant. D) Subjects with clear goals in mind outperformed those without clear goals.	
---	--

听力原文

Passage One

In 2014, one in sixteen Americans visited the hospital emergency room for home injuries. One of the main causes of these accidents? A wandering mind! By one estimate, people daydream through nearly half of their waking hours.

Psychologists have recently focused on the tendency to think about something other than the task one is doing. For one experiment, researchers developed an app to analyze the relationship between daydreaming and happiness. They found that the average person's mind wandered most frequently (about 65% of the time) during personal activities, such as brushing their teeth and combing their hair. Respondents' minds tended to wander more when they felt upset rather than happy. They were more likely to wander toward pleasant topics than unpleasant ones.

How do daydreams affect daydreamers? A wandering mind leaves us vulnerable when driving. In one study, researchers interviewed 955 people involved in traffic accidents, the majority of them reported having daydream just before the accident. Yet other research suggests that daydreaming has benefits. Researchers have found that it gives us a chance to think about our goals and it also seems to increase creativity. In one experiment, 145 undergraduates completed four "unusual uses" tasks, each requiring them to list as many uses as possible for everyday objects. After the first pair of tasks was completed, one

笔记区:

group of participants was assigned an undemanding activity intended to cause their minds to wander. When all the participants proceeded to the second pair of tasks, the daydreamers performed 40 percent better than the others.

Recording One 1. A) Causes of sleeplessness. B) Cross-cultural communication. C) Cultural psychology. D) Motivation and positive feelings. 2. A) They attach great importance to sleep. B) They often have trouble falling asleep. C) They pay more attention to sleep efficiency. D) They generally sleep longer than East Asians. 3. A) By asking people to report their sleep habits. B) By observing people's sleep patterns in labs. C) By having people wear motion-detecting watches. D) By videotaping people's daily sleeping processes.	笔记区：
--	-------------

4. A) It has made remarkable progress in the past few decades. B) It has not yet explored the cross-cultural aspect of sleep. C) It has not yet produced anything conclusive. D) It has attracted attention all over the world.	
--	--

听力原文

Recording One

I'm a psychology professor at the University of British Columbia. I specialize in cultural psychology examining similarities and differences between East Asians and North Americans. Our research team has been looking at cultural differences in self-enhancing motivations, how people have positive feelings towards not only themselves but things connected to themselves. For example, when you own something, you view it as more valuable than when you don't own it. It's called the "endowment effect". The strength of that effect is stronger in Western cultures than in East Asian cultures. So we've been looking at other ways of seeing whether this motivation to view oneself positively is shaped by cultural experiences.

We've also started to look at how culture shapes sleep. We're still in the exploratory stages of this project — although what's noteworthy is that East Asians on average sleep about an hour and a half less each night than North Americans do. And it's not a more efficient sleep, not like they're compressing relatively more value out of their hours. Other studies have found that even infants in East Asia sleep about an hour less than European infants. So we're trying to figure out how culture shapes the way you sleep.

Our experiment does not take place in a sleep lab. Instead we lend people motion-detecting watches and they wear them for a week at a time—whenever they're not having a

笔记区:

shower or swimming, they keep it on. These kinds of watches are used in sleep studies as a way of measuring how long people are sleeping, how efficient their sleep is, and whether they're waking up in the night. Ideally, I'd like to take this into a controlled lab environment. We'll see where the research points us. We usually start off with the more affordable methods, and if everything looks promising, then it'll justify trying to build a sleep lab and study sleep across cultures that way.

Why do we study sleep? Sleep is something that has really been an unexplored topic cross-culturally. I'm attracted to it because culture isn't something that only shapes the way our minds operate; it shapes the way our bodies operate too, and sleep is at the intersection of those.

课堂例题

例题一 Overall, Moss outlines the industry's dependence on making their products inexpensive, super delicious, and incredibly convenient for consumers. Now that more and more people care about what they put in their bodies and are wanting to eat healthier, these companies are finding it really difficult to meet that new demand because of their own addiction to making these convenience foods. Why are companies finding it difficult to satisfy consumers' demand for healthier food products? A) They think speed of production outweighs consumers' health. B) They believe their industry would perish without fast foods.	笔记区：
---	-------------

- C) They have to strike a balance between taste and nutrition.
- D) They are hooked on manufacturing convenience foods.

例题二

In the workplace, managers routinely make decisions about who to hire or fire and which loan to approve, to name a few. These are areas where *algorithmic*(算法的) prescription is replacing human judgment, and so people who might have had the chance to develop practical judgment in these areas no longer will.

What is the consequence of algorithmic prescription replacing human judgment?

- A) People lose the chance to cultivate the ability to make practical judgments.
- B) People are prevented from participating in making major decisions in the workplace.
- C) Managers no longer have the chance to decide which loan to approve.
- D) Managers do not need to take the trouble to determine who to hire or fire.

例题三

Not all psychologists agree. There're plenty working hand in glove with a £12bn-a-year industry that has turned the manipulation of adult emotions and desires into an art form—often literally. It's also one that's forever developing new ways to persuade our children to desire material possessions, and because of advertisements' viral effect they only need to infect a few to reach the many.

Advertising and marketing can serve a useful purpose for children. Marketing may help socialize children as consumers, inform them about products, and help them carve out unique identities as they reach adulthood.

What does the author imply about the impact of advertising?

- A) It is actually infectious to many rather than a few.
- B) It is rooted in our desire for material possessions.
- C) It is comparable to that of virus.
- D) It is literally limited to children.

隐含因果&解释说明

课程简介

在本次课程中，我们将学习如何借助隐含因果逻辑和解释说明逻辑在文章中找到阅读重点，从而迅速锁定正确答案。

课堂例题

例题一 Some of this data analysis can produce unexpected results. For example, it was found that people who sat at 12-person lunch tables tended to interact, share ideas more and outperform those who regularly sat at four-person tables, a fact that would probably have gone undetected without such data analysis. What does the author want to show by the example of different numbers of people interacting at lunch tables? A) Data analysis is key to the successful implementation of workplace surveillance. B) Analyzing data gathered from workers can yield something unexpected. C) More workmates sitting at a lunch table tend to facilitate interaction and idea sharing.	笔记区：
---	-------------

D) It is hard to decide on how many people to sit at a lunch table without data analysis.

例题二

Over the last few years a Stockholm co-working space called Epicenter has gone much further and holds popular "chipping parties", where people can have microchips implanted in their hands. They can use the implants to access electronically-controlled doors, or monitor how typing speed correlates with heart rate. Implanted chips may seem extreme, but it is a relatively small step from ID cards and biometrics to such devices.

As long as such schemes are voluntary, there will probably be a growing number of convenience-oriented uses so that a substantial number of workers would opt to have a chip inserted. But if implanted chips are used to reduce slack time or rest breaks, that could prove to be detrimental. And if surveillance tools take away autonomy, that's when they prove most unpopular. A lot depends on how such monitoring initiatives are communicated and this could prevent possible revolts being staged.

If bosses don't communicate effectively, employees assume the worst. But if they're open about the information

they're collecting and what they're doing with it, research suggests 46% of employees are generally okay with it.

Although many such monitoring schemes use anonymised data and participation is voluntary, many staffers remain sceptical and fear an erosion of their civil liberties.

What does much of the positive effect of monitoring initiatives depend on?

- A) How frequently employees are to be monitored.
- B) What specific personal information is being excluded.
- C) What steps are taken to minimize their detrimental impact.
- D) How well bosses make known their purpose of monitoring.

例题三

In a famous study, psychologists Victoria Horner and Andrew Whiten showed two groups of test subjects—children and chimpanzees—a mechanical box with a treat inside. In one condition, the box was opaque, while in the other it was transparent. The experimenters demonstrated how to open the box to retrieve the treat, but they also

included the irrelevant step of tapping on the box with a stick.

Oddly, the children carefully copied all the steps to open the box, even when they could see that the stick had no practical effect. That is, they copied irrationally: Instead of doing only what was necessary to get their reward, children slavishly imitated every action they'd witnessed.

What does the author think is odd about the findings of the study by Victoria Horner and Andrew Whiten?

- A) Children irrationally imitated every action of the experimenters.
- B) Chimpanzees could tell the transparent box from the opaque one.
- C) Chimpanzees could retrieve the treat more quickly than children did.
- D) Children omitted the step of tapping on the box with a stick to open it.

转折

课程简介

在本次课程中，我们将学习如何借助转折逻辑在文章中找到重点信息，从而提高阅读效率，快速找到答案信息。

课堂例题

例题一 Phonics, which involves sounding out words <i>syllable</i>(音节) by syllable, is the best way to teach children to read. But in many classrooms, this can be a dirty word. So much so that some teachers have had to sneak phonics teaching materials into the classroom. Most American children are taught to read in a way that study after study has found to be wrong. What do we learn about phonics in many American classrooms? A) It is ill reputed. B) It is mostly misapplied. C) It is arbitrarily excluded. D) It is misrepresented. 例题二	笔记区：
---	-------------

If bosses don't communicate effectively, employees assume the worst. But if they're open about the information they're collecting and what they're doing with it, research suggests 46% of employees are generally okay with it. Although many such monitoring schemes use anonymised data and participation is voluntary, many staffers remain sceptical and fear an erosion of their civil liberties.

So workplace surveillance could be empowering for staff and useful for companies looking to become more efficient and profitable. But implemented in the wrong way, it could also become an unpopular tool of oppression that proves counterproductive.

What concern do monitoring initiatives cause among many staffers?

- A) They may empower employers excessively.
- B) They may erode the workplace environment.
- C) They may infringe upon staffers' entitled freedom.
- D) They may become counterproductive in the long run.

例题三

But to the extent that unpredictability is part of how people understand themselves and part of what people like about

themselves, humanity is in the process of losing something significant. As they become more and more predictable, the creatures inhabiting the increasingly AI-mediated world will become less and less like us.

Why does the author say the creatures living in the more and more AI-mediated world will become increasingly unlike us?

- A) They will have lost the most significant human element of being intelligent.
- B) They will no longer possess the human characteristic of being unpredictable.
- C) They will not be able to understand themselves as we can do today.
- D) They will be deprived of what their predecessors were proud of about themselves.

对比

课程简介

课堂例题

例题一 The government, however, seems to have given the report a thumbs-up. Rather than addressing chronic hunger and malnutrition through an improved access to wholesome and nutrient-dense foods, the government is opening the door for company-dependent solutions, ignoring the environmental and economic cost, which will destroy local food systems. It's a model full of danger for future generations. How does the Indian government respond to the EAT-Lancet Commission's proposals? A) It accepts them at the expense of the long-term interests of its people. B) It intends them to spark conversations among all Indian stakeholders.	笔记区：
--	-------------

C) It gives them approval regardless of opposition from nutrition experts.

D) It welcomes them as a tool to address chronic hunger and malnutrition.

例题二

Beyond moral issues, others contend that hunting is not practical. According to the Humane Society of the United States, the vast majority of hunted species—such as waterfowl, rabbits, upland birds and mourning doves—“provide minimal nutrition and do not require population control” .

What is the argument of the Humane Society of the United States against hunting?

A) Overpopulation is not an issue for most hunted animals.

B) Hunting deprives animal populations of their food sources.

C) Many birds and small animals are being irrationally killed.

D) Hunting is universally acknowledged as a savage behavior.

例题三

On its own, plant and animal agriculture contributes 9 percent of all the country's greenhouse gas emissions. That's not counting the fuel burned in transportation, processing, refrigeration, and other waypoints between farm and belly. Red meats are among the biggest and most notorious emitters, but trucking a salad from California to Minnesota in January also carries a significant burden. And greenhouse gas emissions aren't the whole story. Food production is the largest user of fresh water, largest contributor to the loss of biodiversity, and a major contributor to using up natural resources.

All of these points and more showed up in the Dietary Guidelines Advisory Committee's scientific report, released last February. Miriam Nelson chaired the subcommittee in charge of sustainability for the report, and is disappointed that eating less meat and buying local food aren't in the final product. "Especially if you consider that eating less meat, especially red and processed, has health benefits," she says.

What do we learn from the Dietary Guidelines Advisory Committee's scientific report?

A) Food is easily contaminated from farm to belly.

B) Greenhouse effect is an issue still under debate. C) Modern agriculture has increased food diversity. D) Farming consumes most of our natural resources.

课堂例题

例题一 Organic agriculture is a relatively untapped resource for feeding the Earth's population, especially in the face of climate change and other global challenges. That's the conclusion I reached in reviewing 40 years of science comparing the long-term prospects of organic and conventional farming. What do we learn from the conclusion of the author' s review study? A) More resources should be tapped for feeding the world's population. B) Organic farming may be exploited to solve the global food problem. C) The long-term prospects of organic farming are yet to be explored.	笔记区：
---	-------------

D) Organic farming is at least as promising as conventional farming.

例题二

It's possible that Steel is exaggerating the demands of her schedule. Self-imposed sleeplessness has "become a bit of a status symbol", says Taylor, a misguided measure to prove how powerful and productive you are. Margaret Thatcher was also said to get by on four hours a night while the 130-hour work weeks endured by tech heads has been held up as key to their success.

What does Maryanne Taylor think of self-imposed sleeplessness?

- A) It may turn out to be key to a successful career.
- B) It may be practiced only by certain tech heads.
- C) It may symbolise one's importance and success.
- D) It may well serve as a measure of self-discipline.

例题三

Historical precedent suggests that science and politics can overcome resistance from businesses that pollute and poison but it takes time, and success often starts small. So it is heartening to note that a programme in Leeds has

achieved a reduction in childhood obesity, becoming the first UK city to reverse a fattening trend. The best results were among younger children and in more deprived areas. When 28% of English children aged two to 15 are obese, a national shift on the scale achieved by Leeds would lengthen hundreds of thousands of lives. A significant factor in the Leeds experience appears to be a scheme called HENRY, which helps parents reward behaviours that prevent obesity in children.

What can we learn from the past experience in tackling public health emergencies?

- A) Governments have a role to play.
- B) Public health is a scientific issue.
- C) Priority should be given to deprived regions.
- D) Businesses' responsibility should be stressed.

关键位置（下）

课程简介

在本次课程中，我们将学习仔细阅读文章中关键位置的最后一种——文章末句，利用好文章结尾处的关键信息，可以极大地提高答题效率。

课堂例题

例题一 The Department for Education's guidance says schools can charge only for board and lodging if the trip is part of the syllabus, and that students receiving government aid are exempt from these costs. However, many schools seem to ignore the advice; and it does not cover the kind of glamorous, exotic trips, which are becoming increasingly common. Schools cannot be expected to bring together communities single-handed. But the least we should expect is that they do not foster divisions and exclude those who are already disadvantaged. What is the author's expectation of schools? A) Bringing a community together with ingenuity. B) Resolving the existing discrepancies in society. C) Avoiding creating new gaps among students.	笔记区：
---	-------------

D) Giving poor students preferential treatment.

例题二

Ultimately, social media has increased our ability to connect with various types of people all over the globe. It has opened doors for businesses and allowed us to stay connected to people whom we may not otherwise get to follow. However, social media should feel like a fun experience, not one that contributes to negative thoughts and feelings. If the latter is the case, increasing face to face time with trusted friends, and minimizing time scrolling online, will prove to be a reminder that your social network is much more rewarding than any “like” , “follow” or “share” can be.

What does the author advise people to do when they find their online experience unconstructive?

- A) Use social media to increase their ability to connect with various types of people.
- B) Stay connected to those whom they may not otherwise get to know and befriend.
- C) Try to prevent negative thoughts and feelings from getting into the online pages.
- D) Strengthen ties with real-life friends instead of caring about their online image.

例题三

Despite lower yields, organic agriculture is more profitable for farmers, because consumers are willing to pay more. Higher prices, called price premiums, can be justified as a way to compensate farmers for providing ecosystem services and avoiding environmental damage or external costs.

Why does the author think higher prices of organic farm produce are justifiable?

- A) They give farmers going organic a big competitive edge.
- B) They motivate farmers to upgrade farming technology.
- C) Organic farming costs more than conventional farming.
- D) Organic farming does long-term good to the ecosystem.

主旨题

课程简介

在本次课程中，我们将介绍全文主旨题的做题思路和解题方法，帮助大家提高这类题目的答题效率和准确率。

课堂例题

例题一 Economically speaking, are we better off than we were ten years ago? Twenty years ago? In their thirst for evidence on this issue, commentators seized on the recent report by the Census Bureau, which found that average household income rose by 5.2% in 2015. Unfortunately, that conclusion puts too much weight on a useful, but flawed and incomplete, statistic. Among the more significant problems with the Census's measure are that: 1) it excludes taxes, transfers, and compensation like employer-provided health insurance; and 2) it is based on surveys rather than data. Even if precisely measured, income data exclude important determinants of economic well-being, such as the hours of work needed to earn that income.	笔记区：
---	-------------

While thinking about the question, we came across a recently published article by Charles Jones and Peter Klenow, which proposes an interesting new measure of economic welfare. While by no means perfect, it is considerably more comprehensive than average income, taking into account not only growth in consumption per person but also changes in working time, life expectancy, and inequality. Moreover, it can be used to assess economic performance both across countries and over time.

The Jones-Klenow method can be illustrated by a cross-country example. Suppose we want to compare the economic welfare of citizens of the U.S. and France in 2005.

In 2005, as the authors observe, real consumption per person in France was only 60% as high as the U.S., making it appear that Americans were economically much better off than the French on average. However, that comparison omits other relevant factors: leisure time, life expectancy, and economic inequality. The French take longer vacations and retire earlier, so typically work fewer hours; they enjoy a higher life expectancy, presumably reflecting advantages with respect to health care, diet, lifestyle, and the like; and income and consumption are somewhat more equally distributed there than in the U.S. Because of these

differences, comparing France's consumption with the U.S.'s overstates the gap in economic welfare.

Similar calculations can be used to compare the U.S. and other countries. For example, this calculation puts economic welfare in the United Kingdom at 97% of U.S. levels, but estimates Mexican well-being at 22%.

The Jones-Klenow measure can also assess an economy's performance over time. According to this measure, as of the early-to-mid-2000s, the U.S. had the highest economic welfare of any large country. Since 2007, economic welfare in the U.S. has continued to improve. However, the pace of improvement has slowed markedly.

Methodologically, the lesson from the Jones-Klenow research is that economic welfare is multi-dimensional. Their approach is flexible enough that in principle other important quality-of-life changes could be incorporated—for example, decreases in total emissions of pollutants and declines in crime rates.

What can we infer from the passage about American people's economic well-being?

A) It is much better than that of their European counterparts.

B) It has been on the decline ever since the turn of the century. C) It has not improved as much as reported by the Census Bureau. D) It has not been accurately assessed and reported since mid-2000s.

课程简介

在本次课程中，我们将结合完整的仔细阅读真题，带着大家回顾解题技巧，巩固方法体系。

课堂例题

Home to virgin reefs, rare sharks and vast numbers of exotic fish, the Coral Sea is a unique haven of biodiversity off the northeastern coast of Australia. If a proposal by the Australian government goes ahead, the region will also become the world's largest marine protected area, with restrictions or bans on fishing, mining and marine farming. The Coral Sea reserve would cover almost 990,000 square kilometres and stretch as far as 1,100 kilometres from the coast. Unveiled recently by environment minister Tony Burke, the proposal would be the last in a series of proposed marine reserves around Australia's coast. But the scheme is attracting criticism from scientists and conservation groups, who argue that the government	笔记区：
--	-------------

hasn't gone far enough in protecting the Coral Sea, or in other marine reserves in the coastal network.

Hugh Possingham, director of the Centre of Excellence for Environmental Decisions at the University of Queensland, points out that little more than half of the Coral Sea reserve is proposed as a 'no take' area, in which all fishing would be banned. The world's largest existing marine reserve, established last year by the British government in the Indian Ocean, spans 544,000 km² and is a no-take zone throughout. An alliance of campaigning conservation groups argues that more of the Coral Sea should receive this level of protection.

"I would like to have seen more protection for coral reefs," says Terry Hughes, director of the Centre of Excellence for Coral Reef Studies at James Cook University in Queensland. "More than 20 of them would be outside the no-take area and vulnerable to catch-and-release fishing" .

As *Nature* went to press, the Australian government had not responded to specific criticisms of the plan. But Robin Beaman, a marine geologist at James Cook University, says that the reserve does "broadly protect the range of habitat" in the sea. "I can testify to the huge effort that

government agencies and other organizations have put into trying to understand the ecological values of this vast area,” he says.

Reserves proposed earlier this year for Australia's southwestern and northwestern coastal regions have also been criticised for failing to give habitats adequate protection. In August, 173 marine scientists signed an open letter to the government saying they were “greatly concerned” that the proposals for the southwestern region had not been based on the “core science principles” of reserves—the protected regions were not, for instance, representative of all the habitats in the region, they said.

Critics say that the southwestern reserve offers the greatest protection to the offshore areas where commercial opportunities are fewest and where there is little threat to the environment, a contention also levelled at the Coral Sea plan.

1. What do we learn from the passage about the Coral Sea?

- A) It is exceptionally rich in marine life.
- B) It is the biggest marine protected area.
- C) It remains largely undisturbed by humans.

D) It is a unique haven of endangered species.

2. What does the Australian government plan to do according to Tony Burke?

- A) Make a new proposal to protect the Coral Sea.
- B) Revise its conservation plan owing to criticisms.
- C) Upgrade the established reserves to protect marine life.
- D) Complete the series of marine reserves around its coast.

3. What is scientists' argument about the Coral Sea proposal?

- A) The government has not done enough for marine protection.
- B) It will not improve the marine reserves along Australia's coast.
- C) The government has not consulted them in drawing up the proposal.
- D) It is not based on sufficient investigations into the ecological system.

4. What does marine geologist Robin Beaman say about the Coral Sea plan?

- A) It can compare with the British government's effort in the Indian Ocean.
- B) It will result in the establishment of the world's largest marine reserve.
- C) It will ensure the sustainability of the fishing industry around the coast.
- D) It is a tremendous joint effort to protect the range of marine habitats.

5. What do critics think of the Coral Sea plan?

- A) It will do more harm than good to the environment.
- B) It will adversely affect Australia's fishing industry.
- C) It will protect regions that actually require little protection.
- D) It will win little support from environmental organisations.

课程简介

在本次课程中，我们将结合完整的仔细阅读真题，带着大家回顾解题技巧，巩固方法体系。

课堂例题

Back in 1964, in his book <i>Games People Play</i>, psychiatrist Eric Beme described a pattern of conversation he called “Why Don't You—Yes But”, which remains one of the most irritating aspects of everyday social life. The person adopting the strategy is usually a chronic complainer. Something is terrible about their relationship, job, or other situation, and they moan about it ceaselessly, but find some excuse to dismiss any solution that's proposed. The reason, of course, is that on some level they don't want a solution; they want to be validated in their position that the world is out to get them. If they can “win” the game—dismissing every suggestion until their <i>interlocutor</i>(对话者) gives up in annoyance—they get to feel pleausurably <i>righteous</i>(正当的) in their resentments and excused from any obligation to change.	笔记区：
---	-------------

Part of the trouble here is the so-called responsibility/fault *fallacy*(谬误). When you're feeling hard done by—taken for granted by your partner, say, or obliged to work for a half-witted boss—it's easy to become attached to the position that it's not your job to address the matter, and that doing so would be an admission of fault. But there's a confusion here. For example, if I were to discover a newborn at my front door, it wouldn't be my fault, but it most certainly would be my responsibility. There would be choices to make, and no possibility of avoiding them, since trying to ignore the matter would be a choice. The point is that what goes for the baby on the doorstep is true in all cases: even if the other person is 100% in the wrong, there's nothing to be gained, long-term, from using this as a justification to evade responsibility.

Should you find yourself on the receiving end of this kind of complaining, there's an ingenious way to shut it down—which is to agree with it, ardently. Psychotherapist Lori Gottlieb describes this as “over-validation”. For one thing, you'll be spared further moaning, since the other person's motivation was to confirm her beliefs, and now you're confirming them. But for another, as Gottlieb notes, people confronted with over-validation often hear their

complaints afresh and start arguing back. The notion that they're utterly powerless suddenly seems unrealistic—not to mention rather annoying—so they're prompted instead to generate ideas about how they might change things.

“And then, sometimes, something magical might happen,” Gottlieb writes. The other person “might realise she's not as trapped as you are saying she is, or as she feels.” Which illustrates the irony of the responsibility/fault fallacy: evading responsibility feels comfortable, but turns out to be a prison; whereas assuming responsibility feels unpleasant, but ends up being freeing.

1. What is characteristic of a chronic complainer, according to psychiatrist Eric Berne?

- A) They only feel angry about their ill treatment and resent whoever tries to help
- B) They are chronically unhappy and ceaselessly find fault with people around them.
- C) They constantly dismiss others' proposals while taking no responsibility for tackling the problem.
- D) They lack the knowledge and basic skills required for successful conversations with their interlocutors.

2. What does the author try to illustrate with the example of the newborn on one's doorstep?

- A) People tend to think that one should not be held responsible for others' mistakes.
- B) It is easy to become attached to the position of overlooking one's own fault.
- C) People are often at a loss when confronted with a number of choices.
- D) A distinction should be drawn between responsibility and fault.

3. What does the author advise people to do to chronic complainers?

- A) Stop them from going further by agreeing with them.
- B) Listen to their complaints ardently and sympathetically.
- C) Ask them to validate their beliefs with further evidence.
- D) Persuade them to clarify the confusion they have caused

4. What happens when chronic complainers receive over-validation?

- A) They are motivated to find ingenious ways to persuade their interlocutor.

B) They are prompted to come up with ideas for making possible changes.

C) They are stimulated to make more complaints.

D) They are encouraged to start arguing back.

5. How can one stop being a chronic complainer according to the author?

A) Analysing the so-called responsibility/fault fallacy.

B) Avoiding hazardous traps in everyday social life.

C) Assuming responsibility to free oneself.

D) Awaiting something magical to happen.

在本次课程中，我们将带同学们梳理匹配题的解题步骤与方法，结合科学的泛读方法提高效率，从而完成快速匹配。

课堂例题

Slow Hope	笔记区：
[A] Our world is full of—mostly untold—stories of slow hope, driven by the idea that change is possible. They are ‘slow’ in their unfolding, and they are slow because they come with setbacks. [B] At the beginning of time—so goes the myth—humans suffered, shivering in the cold and dark until the <i>titan</i>(巨人) Prometheus stole fire from the gods. Just as in the myth, technology—first fire and stone tools, and later farming, the steam engine and industry, fossil fuels, chemicals and nuclear power—has allowed us to alter and control the natural world. The myth also reminds us that these advances have come at a price: as a punishment for Prometheus’ Crime, the gods created Pandora, and they	

gave her a box filled with evils and curses. When Pandora's box was opened, it unleashed swarms of diseases and disasters upon humankind.

[C] Today we can no longer ignore the ecological curses that we have released in our search for warmth and comfort. In engineering and exploiting and transforming our habitat, we have opened tens of thousands of Pandora's boxes. In recent decades, environmental threats have expanded beyond regional boundaries to have global reach and, most hauntingly, are multiplying at a dizzying rate. On a regular basis, we are reminded that we are running out of time. Year after year, faster and faster, consumption outpaces the biological capacity of our planet. Stories of accelerated catastrophe multiply. We fear the breakdown of the electric grid, the end of non-renewable resources, the expansion of deserts, the loss of islands, and the pollution of our air and water.

[D] Acceleration is the signature of our time. Populations and economic activity grew slowly for much of human history. For thousands of years and well into early modern times, world economies saw no growth at all, but from

around the mid-19th century and again, in particular, since the mid-20th, the real GDP has increased at an enormous speed, and so has human consumption. In the Middle Ages, households in Central Europe might have owned fewer than 30 objects on average; in 1900, this number had increased to 400, and in 2020 to 15,000. The acceleration of human production, consumption and travel has changed the animate and inanimate spheres. It has echoed through natural processes on which humans depend. Species extinction, deforestation, damming of rivers, occurrence of floods, the depletion of ozone, the degradation of ocean systems and many other areas are all experiencing acceleration. If represented graphically, the curve for all these changes looks rather like that well-known hockey stick: with little change over *millennia*(数千年) and a dramatic upswing over the past decades.

[E] Some of today's narratives about the future seem to suggest that we too, like Prometheus, will be saved by a new Hercules, a divine engineer, someone who will mastermind, manoeuvre and manipulate our planet. They suggest that geoengineering, cold fusion or faster-than-light spaceships might transcend once and for all the

terrestrial constraints of rising temperatures, lack of energy, scarcity of food, lack of space, mountains of waste, polluted water—you name it.

[F] Yet, if we envisage our salvation to come from a *deus ex machina* (解围之神), from a divine engineer or a tech solutionist who will miraculously conjure up a new source of energy or another cure-all with revolutionary potency, we might be looking in the wrong place. The fact that we now imagine our planet as a whole does not mean that the ‘rescue’ of our planet will come with one big global stroke of genius and technology. It will more likely come by many small acts. Global heating and environmental degradation are not technological problems. They are highly political issues that are informed by powerful interests. Moreover, if history is a guide, then we can assume that any major transformations will once again be followed by a huge set of unintended consequences. So what do we do?

[G] This much is clear: we need to find ways that help us flatten the hockey-stick curves that reflect our ever-faster pace of ecological destruction and social acceleration. If we

acknowledge that human manipulation of the Earth has been a destructive force, we can also imagine that human endeavours can help us build a less destructive world in the centuries to come. We might keep making mistakes. But we will also keep learning from our mistakes.

[H] To counter the fears of disaster, we need to identify stories, visions and actions that work quietly towards a more hopeful future. Instead of one big narrative, a story of unexpected rescue by a larger-than-life hero, we need multiple stories: we need stories, not only of what Rob Nixon of Princeton University has called the ‘slow violence’ of environmental degradation (that is, the damage that is often invisible at first and develops slowly and gradually), but also stories of what I call ‘slow hope’ .

[I] We need an acknowledgment of our present ecological plight but also a language of positive change, visions of a better future. In The Principle of Hope (1954-59), Ernst Bloch, one of the leading philosophers of the future, wrote that ‘the most tragic form of loss...is the loss of the capacity to imagine that things could be different’ . We need to identify visions and paths that will help us imagine

a different, more just and more ecological world Hope, for Bloch, has its starting point in fear, in uncertainty, and in crisis: it is a creative force that goes hand in hand with *utopian*(乌托邦的) ‘wishful images’ . It can be found in cultural products of the past—in fairy tales, in fiction, in architecture, in music, in the movies—in products of the human mind that contain ‘the outlines of a better world’ . What makes us ‘authentic’ as humans are visions of our ‘potential’ . In other words: living in hope makes us human.

[J] The power of small, grassroots movements to make changes that spread beyond their place of origin can be seen with the Slow Food movement, which began in Italy in the 1980s. The rise of fast-food restaurants after the Second World War produced a society full of cheap, industrially made foodstuffs. Under the leadership of Carlo Petrini, the Slow Food movement began in Piedmont, a region of Italy with a long history of poverty, violence and resistance to oppression. The movement transformed it into a region hospitable to traditional food cultures—based on native plants and breeds of animals. Today, Slow Food operates in more than 160 countries, poor and rich. It has given rise to

thousands of projects around the globe, representing democratic politics, food sovereignty, biodiversity and sustainable agriculture.

[K] The *unscrupulous*(无所顾忌的)commodification of food and the destruction of foodstuffs will continue to devastate soils, livelihoods and ecologies. Slow Food cannot undo the irresistible developments of the global food economy, but it can upset its theorists, it can ‘speak differently’ , and it can allow people and their local food traditions and environments to flourish. Even in the United States—the fast-food nation—small farms and urban gardens are on the rise. The US Department of Agriculture provides an Urban Agriculture Toolkit and, according to a recent report, American *millennials*(千禧一代) are changing their diets. In 2017, 6 per cent of US consumers claimed to be strictly vegetarian, up from 1 per cent in 2014. As more people realise that ‘eating is an agricultural act’ , as the US poet and environmental activist Wendell Berry put it in 1989, slow hope advances.

36. It seems some people today dream that a cutting-edge new technology might save them from the present ecological disaster.

37. According to one great thinker, it is most unfortunate if we lose the ability to think differently.

38. Urgent attention should be paid to the ecological problems we have created in our pursuit of a comfortable life.

39. Even in the fast-food nation America, the number of vegetarians is on the rise.

40. The deterioration of the ecological system is accelerating because of the dramatic increase of human production and consumption.

41. It is obvious that solutions must be found to curb the fast worsening environment and social acceleration.

42. Many people believe changing the world is possible, though it may take time and involve setbacks.

43. It might be wrong to expect that our world would be saved at one stroke with some miraculous technology. 44. It is human nature to cherish hopes for a better world. 45. Technology has given us humans the power to change the natural world, but we have paid a price for the change.

选词填空

课程简介

本次课程中，我们将带同学们学习选词填空的解题步骤与方法，并结合经常出现的考点，帮助大家提高解题的效率与准确率。

课堂例题

The idea of taxing things that are bad for society has a powerful allure. It offers the possibility of a double benefit— <u>26</u> harmful activities, while also providing the government with revenue. Take sin taxes. Taxes on alcohol make it more expensive to get drunk, which reduces excessive drinking and <u>27</u> driving. At the same time, they provide state and local governments with billions of dollars of revenue. Tobacco taxes, which generate more than twice as much, have proven <u>28</u> in the decline of smoking, which has saved millions of lives. Taxes can also be an important tool for environmental protection, and many economists say taxing carbon would be the best way to reduce greenhouse gas emissions. Economic theory says that unlike income or	笔记区：
---	-------------

sales taxes, carbon taxes can actually increase economic efficiency; because companies that 29 carbon dioxide into the sky don't pay the costs of the climate change they cause, carbon taxes would restore the proper 30 to the market.

In reality, carbon taxes alone won't be enough to halt global warming, but they would be a useful part of any climate plan. What's more, the revenue from this tax, which would 31 be hundreds of billions of dollars per year, could be handed out to citizens as a 32 or used to fund green infrastructure projects.

Similarly, a wealth tax has been put forward as a way to reduce inequality while raising revenue. The revenue from this tax, which some experts 33 will be over \$4 trillion per decade, would be designated for housing, child care, health care and other government benefits. If you believe, as many do, that wealth inequality is 34 bad, then these taxes improve society while also 35 government *coffers* (金库).

六级训练营手册

Writing

如何准确审题

课程简介

在这节课中，我们会给大家介绍六级作文常考的出题形式，并结合具体的真题来依次讲解不同出题形式的作文应该如何快速地审题。基于此，再对六级作文常考的话题和写作任务进行总结。

课堂例题 1

Directions: For this part, you are allowed 30 minutes to write an essay on **why students should be encouraged to develop creativity**. You should write at least **150** words but no more than **200** words.

审题分析

• 写作话题：

• 写作任务：

课堂例题 2

Directions: For this part, you are allowed 30 minutes to write a short essay that begins with the sentence “**Nowadays more and more people choose to live an environmentally friendly lifestyle.**” You can make comments, cite examples, or use your personal experiences to develop your essay. You should write at least **150** words but no more than **200** words.

审题分析

- 写作话题：

- 写作任务：

课堂例题 3

Directions: For this part, you are allowed 30 minutes to write an essay related to the short passage given below. In your essay, you are to comment on the phenomenon described in the passage and suggest measures to address the issue. You should write at least **150** words but no more than **200** words.

Some parents in China are overprotective of their children. They plan everything for their children, make all the decisions for them, and do not allow them to explore on their own in case they make mistakes or get hurt.

审题分析

• 写作话题：

• 写作任务：

课堂例题 4

Directions: For this part, you are allowed 30 minutes to write an essay on the saying “**The best preparation for tomorrow is doing your best today.**” You should write at least **150** words but no more than **200** words.

审题分析

• 写作话题：

• 写作任务：

课堂例题 5

Directions: For this part, you are allowed 30 minutes to write an essay based on the picture below. You should focus on the difficulty in acquiring useful information in spite of advanced information technology. You should write at least **150** words but no more than **200** words.

**“We have lots of information technology.
We just don’t have much useful information.”**

如何搭建作文框架

课程简介

在这节课中，我们会给大家介绍六级作文通用的“三段论”结构，以及每个段落的内容安排，为后面的正式写作打下坚实的基础。

“三段论”结构

开头段

- 引出话题背景：

- 回应写作任务：

主体段

- 完成写作任务：

结尾段

- 总结全文：

- 升华主题：

如何拓展写作思路

课程简介

在这节课中，通过对六级作文常考话题的统计与分析，我们会给大家提炼与总结一些关键词，用于主体段的论证与拓展，帮助大家启发思维，快速构思出中文思路。

❖ “影响类” 关键词

- 关键词：

时间&空间；便利&效率；金钱&健康；竞争&发展；精神&品质……

- 适用真题：

❖ “建议措施类” 关键词

• 关键词：

个人角度：学习；实践；自我管理；提升能力……

家庭角度：陪伴；沟通；监督；树立榜样……

学校角度：教育；课程；举办活动……

企业角度：责任&义务；工作环境；企业机制……

政府角度：舆论宣传；拓宽渠道；奖励机制；优化资源；监督管制；制定法律……

• 适用真题：

文字描述型作文：建议措施类

课程简介

在这节课中，我们主要学习文字描述型作文：建议措施类具体的写作思路和方法。内容包括如何搭建建议措施类作文的写作框架，如何构思主体段的写作思路以及每段可复用的功能句型。

课堂例题

Directions: For this part, you are allowed 30 minutes to write a short essay on how to balance academic study and extracurricular activities. You should write at least **150** words but no more than **200** words.

✧ 第一步：审题

• 写作话题：

• 写作任务：

✧ 第二步：搭建作文框架

在“通用大框架”的基础上，结合“提建议措施”这样的写作任务，将每一段内容进行细化，继续总结出“建议措施类”作文的固定写作框架

✧ 第三步：正式书写

开头段

➡ 功能句型：

主体段

💡 拓展思路：

➡ 功能句型 / 衔接手段：

结尾段

✎ 功能句型：

文字描述型作文：利弊影响类

课程简介

在这节课中，我们主要学习文字描述型作文：利弊影响类具体的写作思路和方法。内容包括如何搭建利弊影响类作文的写作框架，如何构思主体段的写作思路以及每段可复用的功能句型。

课堂例题

Directions: For this part, you are allowed 30 minutes to write a short essay on e-learning. Try to imagine what will happen when more and more people study online instead of attending school. You are required to write at least **150** words but no more than **200** words.

✧ 第一步：审题

• 写作话题：

• 写作任务：

✧ 第二步：搭建作文框架

在“通用大框架”的基础上，结合“分析利弊影响”这样的写作任务，将每一段内容进行细化，继续总结出“利弊影响类”作文的固定写作框架

✧ 第三步：正式书写

Translation

翻译话题词汇

课程简介

在本节课中，老师会给大家简单介绍与翻译三大常考话题相关的词汇表达，具体涉及历史文化、旅游地理以及社会发展。

话题词汇分类

1. 历史文化类

中国历史朝代

中国传统文化

2. 旅游地理类 自然地理概况

人文地理概况

3. 社会发展类 中国外交

中国经贸

中国科技

中国环保

中国民生

译前准备1：确定译文时态

课程简介

在本节课中，老师会教大家如何根据文本的题材以及汉语中的一些时间标志词，快速且准确地确定译文的时态。

方法讲解

1. 根据文本的题材，初步确定整个译文的时态

历史文化类

旅游地理类

社会发展类

2. 根据时间标志词，逐一确定每个译句的时态

与现在时态相关的标志词

一般过去时的常见标志词

一般将来时的常见标志词

现在完成时的常见标志词

过去完成时的常见标志词

能够体现时态的汉语副词或助词

扇贝

译前准备2：理清句子成分

课程简介

在本节课中，老师会结合真题例句，给大家介绍拆分与组合翻译法，帮助同学们养成良好的翻译习惯，提高翻译的可操作性。此方法尤其适合搞定那些结构复杂的汉语长句。

课堂例题

1. 在未来五年中，中国将向其他发展中国家在减少贫困、发展教育、农业现代化、环境保护和医疗保健等方面提供援助。

第一步——拆分句子结构
